PROFESSIONAL SUMMARY

Full-Stack & AI-Integrated Developer and B.Tech CSE student with a strong foundation in **Data Structures, Algorithms, and Software Engineering**. Experienced in building full-stack applications using **React, TypeScript, Node.js, REST APIs, and databases**, with hands-on experience integrating **AI/ML capabilities**. Solved **190+ LeetCode problems** and focused on building scalable, high-performance applications.

EDUCATION

Chitkara University <i>Bachelor of Technology in Computer Science Engineering (CGPA: 8.84)</i>	Rajpura, Punjab 2024 to 2028
Tinu Public School <i>Senior Secondary School (Class XII)</i>	Sangam Vihar, New Delhi 2023

TECHNICAL SKILLS

Programming Languages C++, Python, C, Java, R
Machine Learning & Data Scikit-learn, Matplotlib, Feature Engineering, NumPy, Pandas, PyTorch **Web Technologies:** HTML5, CSS3, JavaScript, React, TailwindCSS
Database Management MySQL, PostgreSQL
Tools & Platforms: Git, VS Code

PROJECTS

Trade Control – Trading Dashboard | *Next.js, React, TypeScript, Zustand, WebSockets* [GitHub] | 2026

- Architected an advanced trading dashboard using Next.js and React for portfolio analytics, trading signals, and risk management.
- Implemented real-time portfolio data synchronization using WebSockets and centralized state management with Zustand for responsive trading insights.
- Integrated production backend services and optimized dashboard workflows for reliable real-time monitoring of portfolio performance and market signals.

Saini Sweets E-Commerce Platform | *React, JavaScript, Tailwind CSS, Context API* [GitHub] | 2024

- Architected a full-featured e-commerce web platform using React and Tailwind CSS for seamless online order exploration.
- Implemented dynamic state management via Context API to handle real-time cart operations, reducing state update latency by 40%.
- Optimized asset loading, code splitting, and component hierarchy, improving overall page load speed by 15% and enhancing user conversion flow.

ACHIEVEMENTS

- LeetCode:** Solved 190+ problems; consistently utilize Big O analysis to ensure optimal time complexity solutions.
- IGNITE Hackathon (2026):** Finalist (3rd Rank / 100+ teams) at Panjab University Chandigarh; led frontend development and the database of IndiWealth using React and also the Database setup, implementing responsive UI, financial dashboards, and interactive data visualization features.
- AI Machine Learning** Supervised Machine Learning: Regression and Classification – Stanford Online and DeepLearning.AI.
